

biotek ozone

NATURAL DISINFECTANT GENERATOR FOR HOME CARE

To have a healthy, loving family, home care is your first stepping stone. Keeping your family fit and healthy is fundamental, yet everyday pollutants in your home pose health risks to your loved ones.

A household environment shall be clean and green. If various cleansing solvents are used to disinfect our home, the residual chemicals such as VOC's and artificial odours will adversely affect the health of our loved ones. It would be perfect if a cleansing agent not only effective but also natural is available.

Biotek Ozonated H-7110 water system underwent 20 years of research and has attained over 40 worldwide patents. It adheres strictly to the US Occupational Safety and Health Administration (OSHA) regulations and the Environmental Protection Agency (EPA) safety standards.

The ozonated water produced from H-7100 can destroy virus, germs and decompose residual chemicals. Its disinfection efficiency is 3,125 times stronger than chlorine bactericide. Most important of all, when ozonated water accomplishes its cleansing task, it naturally reverts to water and leaves absolutely no chemical residual behind.

Favorable for home care, it disinfects your kitchenware, foods and utensils, such as a wooden cutting board and raw foods, particularly when detergent is not desired. It also preserves the freshness and taste of your food, disinfects shellfish, and decomposes fertilizer & pesticide residuals on vegetables and fruits. For laundry use, it can sterilize your towels, clothes and draperies when bleach is not suitable.

Biotek ozone is the most simple, powerful and natural disinfectant generator for you to look after your family.
