pH plus Magnetized Alkaline Filtration System 鹼性淨水系統

1st Sediment Filter (5 microns)

For sediment removal including rust, dirt and any particles down to 5 microns in size.

沉澱物過濾芯(5微米)

過濾沉澱物，包括泥沙、鐵鏽和其他雜質。

Model 型號: S2000

2nd UF Membrane Filter (0.1 microns)

For Sediment and antibacterial protection. Removes particulate, bacteria, virus (crystallized acids), fungus, mold and spores. This filter has a micron size of 0.1 which will not allow bacteria or pathogens to pass through.

精密過濾芯 (0.1微米)

去除微粒，如泥沙、細菌、病菌、真菌、黴菌及孢子。

Model 型號: UF2000

3rd PI Ceramic Filter

For antioxidant creation, restructuring and hydroxyl ion (electron) creation. Proprietary formulation of ceramic coated minerals generate antioxidants and free hydroxyl ions in the water, also increase pH.

PI陶瓷過濾芯

製造、重組抗氧化物和製造氫氧根離子(電子)。濾芯陶瓷塗層專有的礦物有效促進水中的抗氧化物和游離的氫氧根離子的產生，同時提高pH值。

Model 型號: PC2000

4th Post Activated Carbon Filter

Coconut source carbon removes organic compounds including chlorine, chloramines, pesticides, bad taste and odors.

活性炭過濾芯

活性炭過濾芯去除有機化合物，包括氯、氯胺、殺蟲劑和異味等。

Model 型號: PA2000

5th Magnetic Filter

Water passes through an energy vortex that both improves the vibrational quality of the water and the water's ability to absorb into cell walls.

磁性濾芯

水通過濾芯內的能量漩渦，提高了水的活躍性，水更易被細胞壁吸收。

Filter Replacement

濾芯更換時間

Filter 濾芯	1 st	2 nd	3 rd	4 th	5 th
Replacement 更換時間	6 months 6 個月		12 months 12 個月		Permanent 永久

Installation

安裝方法

1. Remove the aerator (tip of faucet) currently attached to your faucet.
2. Install diverter, o-ring and parts to faucet.

1. 拆下現有水龍頭的網罩加氣裝置 (水龍頭末端：紗隔)。
2. 套上分流器，O形膠圈及零件。

- Male Connector
外牙(線圈在外)

Diverter Valves 分流器
Model 型號: DVC-16

- Female Connector
內牙(線圈在內)

Adapter Rings 龍頭轉接環
Model 型號: AD-16

Specification

規格

Model 型號	: 2000pH+
Size 尺寸	: 282Wx180Dx298H(mm)
Weight 重量	: 4 kg
Water Flow Rate 出水量	: 0.3 ~ 0.5 gpm
Water Pressure 水壓	: 30 ~ 60 psi
Water Temperature 水溫	: 4°C ~ 38°C 39°F ~ 100°F

Test Report (Hong Kong Standards and Testing Center) 驗水報告(香港標準及檢定中心)
